

Information on countermeasures against COVID-19 infection

Tochigi City state-of-emergency declaration is in effect

~Message to the citizens about prevention of COVID-19 infection~

Tochigi City declared a state of emergency on August 6th and requested the citizens to refrain from going out except for urgent matters. However, the infection status is ranked as stage 4, which is equivalent to the level of explosion in the number of infections.

In response to this situation, we would like to ask for your further support to prevent spreading.

This prolonged COVID-19 situation has changed our lifestyle completely. Tochigi City is committed to protecting the safety and livelihood of the people of the city.

Let us cope with this situation in union to overcome the crisis as soon as possible.

Director-general of Tochigi City COVID-19 response headquarters

Mayor of Tochigi City Hideko Okawa

Request for cooperation

Refrain from going out except for urgent matters
(Especially after 8 p.m.)

Refrain from traveling outside prefecture

Take basic countermeasures
(Continue even after vaccinated)

Refrain from dining, drinking, or having a party in a group of 5 or more

Refrain from drinking or dining with people you meet only occasionally

Act calm and wisely, respecting human rights

The infection is spreading in the city more rapidly than ever.

After August, the more transmissible Delta variant is dominating, and the infection is spreading rapidly.
Please pay more attention to prevention of spreading the infection.

Monthly cases in the city

The number of cases rapidly increased after August.

Number of cases by age group [total]

Significant rise in cases among people in their 20's
